

Pouch Villa Platform

A secure retail commerce and operations platform for discovering, ordering and managing mobile devices.

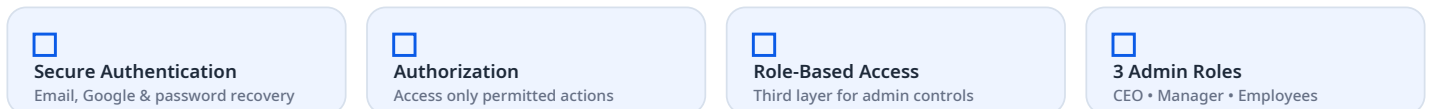

1. Customer Commerce Flow

Each open box represents a delivery item

2. Security & Access

Secure-first by default

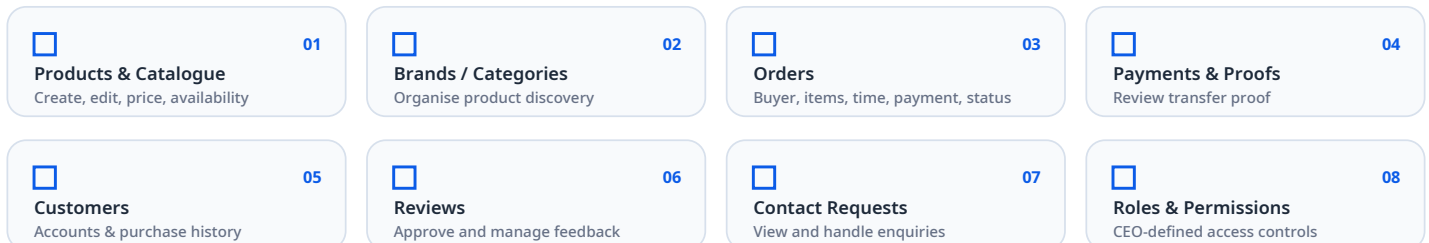

Public: Authentication + Authorization

Admin: Authentication + Authorization + Role-Based Access

CEO controls manager and employee permissions; managers may receive near-full access with CEO-defined restrictions.

3. Business & Admin Operations

Dedicated pages for management and action

4. Supporting Pages

Delivery Standard

This scope defines the committed V1 foundation. Growth features can be introduced in later phases as Pouch Villa evolves.
